# Eduard Horiach

Ruby on Rails Developer

Name: Eduard Horiach

Date of birth: 11 April 1996

Nationality: Ukrainian

## About Me

I well-grounded professional developer with a Master's Degree.

I have 3 years of professional expertise in the Information Technologies (IT) industry. Participated in various projects using a lot of Ruby/Rails and Node.js infrastructures.

## Hobbies

psychology | boxing | dancing | music

## Skills

Ruby on Rails

Ruby

OOP

SQL

DevOps

Javascript

Git

TDD

AWS

Angular JS

PostgresQL

## Education

NTU Dnipro Polytechnic

Software engineering

**2015-2019**

Rocket-and-Space Engineering College

Software engineering

**2011-2015**

## Work Experience

Syndicode

Ruby on Rails Developer

2018-Present

Zapleo

Ruby on Rails Developer

2018

MTP

Ruby on Rails / AngularJS Developer

2017

Thunderrise

Ruby Developer Internship

2016

## Projects

June 2016 - September 2016

### ☐ Ourtime

Ourtime is a mobile app for events based on locations. I developed API and Admin part of Application.

May 2017 - June 2017

### ☐ Nomad

Nomad is a service for showing Guides and Rating of cities I developed API and Front Part of Application.

July 2017 - December 2017

### ☐ Mystery shopping

Mystery shopping (related terms: mystery consumer, secret shopper) is a tool used externally by market research companies, or internally by companies themselves to measure quality of service, or compliance with regulation, or to gather specific information about products and services. The mystery consumer's specific identity and purpose are generally not known by the establishment being evaluated. I've build: - flexible user ability core where each user has its own permissions which can be changed dynamically by manager; - flexible questionnaires that are very similar to Google Form but more complex. Questions can be collected in block which can be collected in their block and so on. Answer on question has points which are used for result calculation which are used for to build report. The customer can build various kind of reports from admin panel.

Feb 2018 - Sept 2018

### ☐ Helsetjenester

Client wanted to add new integrations to his application. Helsetjenester is the service for search and compare health services based on price, area and facilities. I develop mapping for schedule and booking for a new dental integration to API Application.

Apr 2018 - Oct 2018

### ☐ Erinoakkids

My client wanted to "built from scratch" his application. I developed admin panel for manage patient list for different healthcare organizations of Canada. I've added "out of office" option for healthcare organizations workers and patients. So communication between patients and staff become more effective.

Apr 2020 - Present

○ SwiftComply

Adding new features/integrations to the project.
